

MANAGED COMPLIANCE MONITORING

KEY BENEFITS & DELIVERABLES

- **Improved productivity:** Cloud based and proactively managed market-leading SIEM platform complemented with proprietary SecureData technology reduces management overhead, complexity and costs.
- **Reduced risk:** Reporting or alerting on compliance violating events places focus on high-priority remediation requirements lessening the risk to business operations.
- **Reduced costs:** Fully-fledged SIEM functionality without the costs of purchasing and maintaining self-managed on premise or cloud devices
- **Improved compliance:** Internal or regulatory compliance policies auditing requirements fulfilled thorough 365-day storage of logs
- **Increased visibility:** SLA-based alerting highlights potential abnormalities or indicators of violation.
- **Holistic security approach:** Event collection across the estate's devices ensures improved compliance reporting
- **Ongoing detection improvement:** Tuning and retuning log collectors reduce false positives over time increasing ability to accurately report on compliance violations.

SERVICE DESCRIPTION

Fuelled by an ever-increasing number of rules, requirements, procedures, audits and accountability created by legislation, the complexity of today's compliance standards means that businesses find it complicated and expensive to introduce and maintain the compliance measures upon which their business depends.

Many organisations have invested heavily in technology to ensure that network intrusions can be identified as soon as possible. A simple misconfiguration or product update may not only jeopardise the security of the network but may also expose the organisation to compliance-breaching conditions.

Breaching of regulations may lead to:

- Legal action being brought against the organisation or its employees that could result in fines, penalties, imprisonment, product seizures, or debarment.
- Financial impact affecting the organisation's profitability, share value, expected future earnings, budgets or investor confidence.
- Enforced embargos or manufacturing shutdowns disrupting the organisation's ability to operate or supply chains.
- Negative perception of the organisation's reputation or brand such as adverse press or social media discussion, loss of customer trust, or decreased employee

Due to the business-impacting consequences a breach of regulations could have, ongoing compliance monitoring through immediate alerting of compliance-breaching circumstances has become integral to organisation's risk management programmes.

Using templated or custom-written rules, SecureData's Compliance Monitoring provides monitoring, management and reporting designed to address the compliance challenge at a fraction of the cost of DIY solutions or dedicated in-house staff.

Our Compliance Monitoring services are available as a standard option not including per incident alerting or customised triggers and as an advanced full-featured bespoke option.

KEY SERVICE COMPONENTS

- Log & event collection by SecureData's Managed Threat Detection platform
- Log correlation, aggregation & storage for 1 year
- Support of multiple compliance standards incl. FISMA, GLBA, GPG 13, HIPAA, ISO 27001 NIST 800-53, SANS & SOX
- Creation of custom log collection rules (bespoke offering only)
- Access to Threat Intelligence services and full vulnerability database
- Use of proprietary & commercial reputation lists to track communication with potentially malicious IP addresses
- Monthly compliance reporting against supported compliance frameworks
- Notification of compliance violations (bespoke offering only)
- Access to security experts with 25 years' experience to discuss any alerts or incidents (bespoke offering only)

WHY SECUREDATA

Cybersecurity specialists

SecureData specialises in cybersecurity services and solutions, with a 25-year track record of delivering managed services to some of the largest companies in the world.

Outstanding expertise

Our Managed Firewall service is delivered by our UK-based SOC - delivering immediate, 24x7x365 access to specialists who deal with device health incidents, requested and recommended changes, security optimisation and help ensure continuous availability.

Extensive security insight

SecureData's Threat Intelligence platform processes over 30 billion security events per month, giving us unparalleled access to current and emerging threats. SensePost, our elite consulting arm, is at the forefront of cybersecurity - providing insight into the criminal mind-set. We use this information to ensure our Managed Firewall customers are as secure as they possibly can be.

Vendor insights

Our close partnership with Check Point, Fortinet, Cisco and Palo Alto Networks provides superior access to their technical experts and product roadmaps - keeping our SOC's knowledge ahead of the game.

Complementary services

We offer a broad range of services that complement our Managed Firewall service and strengthen your security posture, including Managed IDS/IPS, Managed Threat Detection, Managed Vulnerability Scanning and Managed Compliance Monitoring.

ABOUT SECUREDATA

SecureData is a leading provider of cybersecurity services and solutions.

SecureData looks beyond point technologies to address cybersecurity as a whole. The company offers a comprehensive set of professional and managed security services across the entire attack continuum.

For over 25 years SecureData has been helping organisations assess risks, detect threats, protect assets and respond to breaches quickly and effectively ensuring essential IT infrastructure always remains secure and available.

SensePost, the consulting arm of SecureData includes some of the world's most preminent cybersecurity experts. Trusted by both corporate and military organisations across multiple countries, SensePost helps organisations to protect IT infrastructure and stay ahead of evolving cybersecurity threats.

Operating across the UK, South Africa and the USA, SecureData has an enviable track record having delivered cybersecurity services for many business sectors including finance, insurance, retail, property, professional services, technology and government.
